- **european:** B60R7/04
Application number: JP19810044478 19810326
Priority number(s): JP19810044478 19810326

Abstract of JP57158140

PURPOSE: To allow persons on front and rear seats to simultaneously use a console box as a box for small particles by providing a tray retractable from a body of the console box and disposing a separation member which divides an interior of the box above tray.

CONSTITUTION: An opening 21 is formed at a lower position in a rear wall 10 of a main body 20 of a console box and a tray 22 is retractable from the interior 37 of the box through the opening 21. Two grooves 28, 29 different in height are made in both of internal walls 11a, 12a of the box body 20 on opposite sides and two steps 30, 31 whose positions correspond to those heights of the grooves 28, 29 are formed in an inner front wall 9a of the box body 20. An approximately L-shaped division member 36 built up from an integrated body of a vertical plate 33 which has a matching part 32 slidable along the grooves 28, or 29 and a bottom plate 35 which has a bed part 34 to be laid on the step 30 or 31 is capable of being freely positioned inside the box body 20.
